

(27 x 19 cm). 225 pp. Green publisher's canvas stamped in gilt on the covers. Some fading to the gilt, a bit of rubbing to the head and tail but an exceptionally well-preserved catalog. [We date the catalog based on the mention of an exhibition prize awarded to the firm in 1906].

\$650

Catalogue of pharmaceutical products, in German, illustrated with attractive drawings of the firm's products, largely in wood engravings but also a few photogravures. This is a finely produced catalog, nicely bound in cloth, elegantly illustrated, and printed on coated paper. The firm offers a wide range of products from soaps, toothpaste, condoms, and personal hygiene products, to bandages, first aid kits, support garments, combs, brushes, as well as syringes, medical equipment, hardware, etc. **The catalog benefits greatly from the illustrations, is highly detailed and includes pricing and sales information for purchase by mail order.**

Above: There are a number of options for condoms offered, with discreet carrying cases.
